

Input Data

Stage 1: Stacking Classifier Ensemble

Gradient Boosting

Non-linear boundaries

Random Forest

Flat decision base

FFNN

Feature interactions

Logistic Regression

(Meta-Classifier)

Predicted Class?

(gapValue = 0.5)

Risk = 0

Class 0

Class 1 (Risk > 0.5)

Stage 2: Stacking Regressor Ensemble

Gradient Boosting

Random Forest

FFNN

Ridge Regressor

(Meta-Regressor)

Final Predicted Risk Value
